Applicant drafted a proposed claim which includes the limitation that the patient is not sensitized to the hapten prior to administration of the vaccine. Applicant could include dosage ranges for tumor cells in the claims. Applicant feels that dosages of cyclophosphamide are well known in the art and don't need to be included in the claims. Applicant explained that the protocol in the declaration which included an induction dose is an example of unexpected results, but is not necessary for the unexpected results instantly claimed. The examiner will review the proposed claim and contact applicant with any recommended revisions, and then applicant will fax an after final amendment.
